

Sensu

Sensu

Design Simone Viola

Materials Eco plastic, fabric

Sensu collection takes its name from the well-known Japanese fan: an iconic, light and handy accessory. Its silhouette, consisting of an embracing backrest set on a conical base, aesthetically evokes the Japanese fan, thus making it not only a simple yet comfortable lounge chair, but also light and versatile in use: a seat where you can relax and immerse yourself in another reality. Along with the version equipped with a single cushion, whose fabric and padding make the chair highly versatile

and suitable both for indoor and outdoor environments, there is also the option to cover Sensu completely. Thanks to the Easy Up solution, a complete padding that can be easily removed by means of an elastic fastening system, it is possible to transform Sensu into a fully upholstered chair. Sensu is made of eco plastic, to underline the great sensitivity that TOOU has had for years towards sustainability, making it an authentic witness of our concern for the planet.
